

Puzzle Basket

Items needed for activity ***

Tape (*optional*)

Laundry Basket

Items your child loves and grabs for (*toys, etc*)

Wool or string

Instructions

Put a variety of objects in a laundry basket which you know your baby would want (*specific toys, lotion bottle, etc*) and that can be picked up with one hand (*because your baby will be leaning on the basket with the other hand*).

Tape basket to the floor (*optional with masking tape or painters tape*)

Thread wool or string through the holes of the basket to make a “puzzle” for your baby to put their hands through and pull things out.

Objectives

A problem solving basket recommended for any baby/toddler who is standing/walking on their own.

Promotes fine motor skills, gross motor skills, and problem solving skills.

***This activity can also be done with a casserole pan and rubber bands in lieu of a laundry basket and string.

**Special thanks to Erica Dillow, Salesforce volunteer, for sharing this activity with us.*
