

Shape Hopscotch

Supplies:

Colored paper

Paper plate

Scissors

Some markers (optional)

Tape/Glue (optional)

Thumbtack (optional)

Step 1:

Cut out large shapes with the different colored paper.

Step 2:

You will create a spinner with the paper plate. You can write the name and color of each shape you cut out around the perimeter of the plate. Example: "red square"

Or you can cut out mini shapes and place them around the perimeter of the plate.

Leave room in the middle for either option.

Step 3:

Now that you have your shapes added to or written on the plate, it's time to finish the spinner. Cut out an arrow from the colored paper and use the thumbtack to hold it in the center of the paper plate. If you do not have a thumbtack you can use a pen, pencil, marker, or crayon to spin.

Step 4:

Now that your spinner is complete, you're going to randomly place the shapes you cut out on the floor.

How to Play:

Once everything is ready, spin the spinner. Whatever it lands on is the shape you hop to. If you touch the floor you are out. If you use the same shape for different colors this can help your child learn their shapes and colors.
